

PGY1 Pharmacy Residency Program

at Broward Health North

Broward Health North PGY1 Pharmacy residents will participate in clinical and operational pharmacy practice. As a member of the multidisciplinary team, residents will experience a wide variety of practice environments. Residents select four elective learning experiences from a variety of available options. The diverse clinical services available at Broward Health North provide residents with excellent exposure to many areas of specialized medicine. Longitudinal experiences are integrated throughout the residency year to support continued development in clinical practice, pharmacy operations, research, education, and professional growth. Residents may have opportunities to precept PharmD students throughout the residency year. Residents are required to complete an individual clinical research project, which is presented at local, state, and national professional meetings.

Residency Learning Experiences (6 weeks, June-July)

- Hospital Orientation
- GME Orientation
- Departmental Orientation
 - Includes staffing, anticoagulation monitoring, and kinetics training
